Solar Blinds

Introduction

Sola-Cure.com are part of the Auxano Technologies Group. The foundations of our business are laid in the Maritime sector where Auxano is also a supplier of advanced technology propulsion parts.

Our headquarters are situated in Greater Manchester in the United Kingdom. It is here that our product development, design, sales, accounting and administrative responsibilities are carried out. To facilitate the international marine market, Sola-Cure.com has a network of sales representatives across the globe.

At Sola-Cure we understand the importance of providing our clients with a prompt, courteous and informative service, both before and after sales. We appreciate the demands made upon our clients and aim to make your selection of window blinds as straightforward as possible.

UV Window Blinds

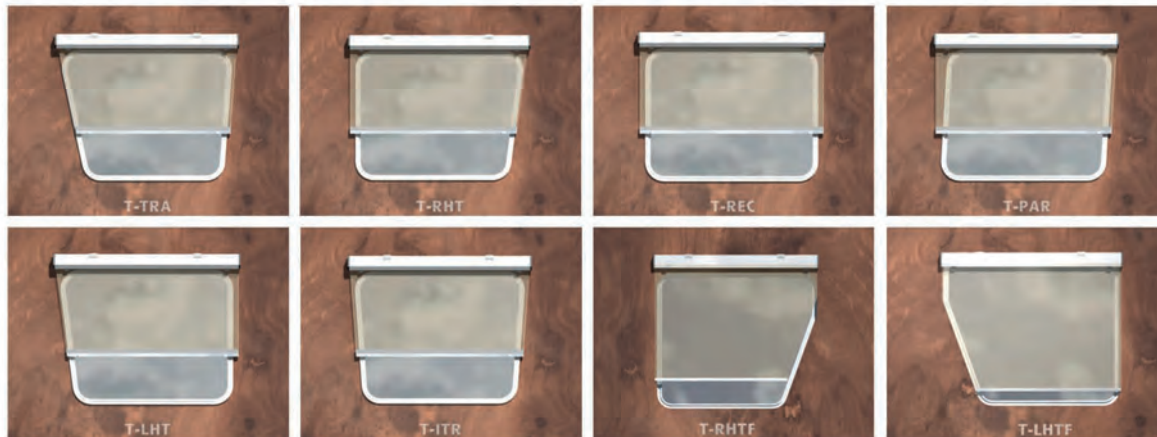

Sola-Cure.com are suppliers of anti-glare and UV protection roller solar shades for the maritime industry. Our high quality marine blinds are Lloyds type approved and suitable for all size and shape of window.

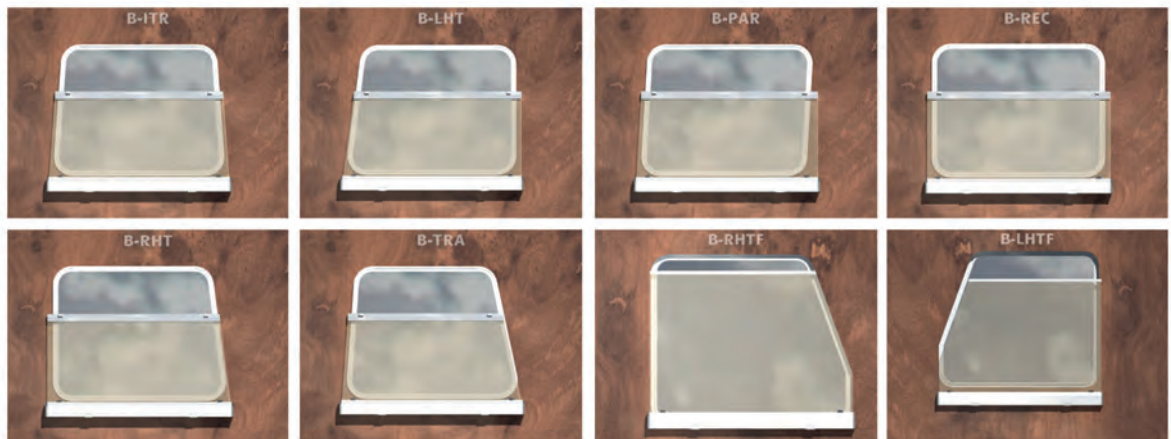

Product Information - Window Designs

Product Codes

Product Information - Window Designs

Product Information - Films

Sola-Cure.com offer a range of highest quality polymer films that handle like traditional shade fabrics. Our choice of films means that our blinds will keep you comfortable at any time of day and in any season without compromising the quality of the view.

Gold • Silver • Bronze • Grey

All our blinds have excellent glare reduction qualities.

- Protecting against direct and reflected sunlight
- Providing a safer environment when navigating
- Reducing eye fatigue

All Sola-Cure products reduce ultra-violet transmission by at least 99%

- Shielding crew and passengers from the cause of skin damage

Sola-Cure films provide outstanding solar energy rejection

- Creating a cooler working environment for crew and passengers
- Protecting furniture and instrumentation from fading and excessive heat

To validate the manufacturers calculated data we independently test all our films at a UKAS approved laboratory. This ensures only the highest quality film is used and conforms to the data supplied.

Please visit www.sola-cure.com to view our range of available shade and technical data.

Marine Blind Features

To complement our high quality range of films, Sola-Cure provides a number of features for housing the film. Durable yet lightweight and easy to install, our blinds can be configured to suit every preference:

Sola-Cure blinds suit all size and shape of window

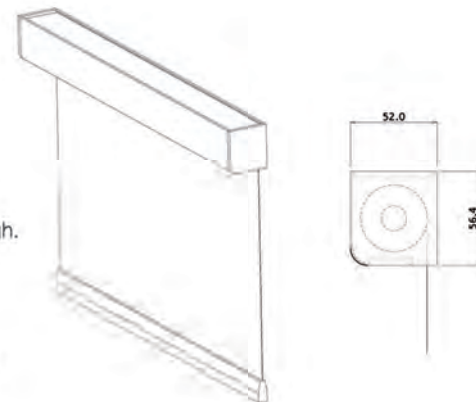

REC Square or rectangular
 RHT Right hand taper
 LHT Left hand taper
 ITR Isosceles taper (equal angles)
 TRA Trapezium / Trapezoid (unequal angles)
 PAR Parallelogram

Slimline cassette

Our slimline wire guide cassettes measure just 52mm deep x 56.4mm high. This makes them perfect for restricted space applications.

Multi-fix mounting brackets

As standard, all Sola-Cure marine blinds can be fitted through vertical, horizontal side and rear positions.

Visit www.sola-cure.com to view our product identification sheet. This can be completed and submitted electronically direct to Sola-Cure.

Marine Blind Options

We provide our customers with a number of options to suit their preference. Simply let us know which options you would like and we manufacture your blind to suit your exact requirements:

Roller operation

CT Constant Tension.

A spring loaded roller mechanism that is constantly under tension. Lock the blind in position with the pull cord clamp.

SL Self Locking.

The self locking mechanism allows the user to draw the blind to the desired position and automatically lock it into position. A quick release mechanism is activated when the cord is pulled.

Pull cord square and clamp

All our blinds are supplied with a pull cord square and clamp.

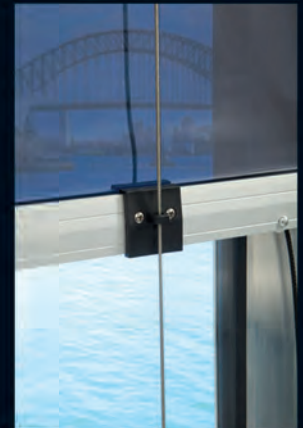

The pull cord can be located to the left, right or centre of the blind.

Wire guide

Wire guides are used to keep the blind parallel to the glass. They are necessary for inclined windows and applications where the cassette is to be housed at the base of the window. As with all our blinds, the wire guide option is incredibly quick and easy to install.

Classification and legislation

ISO468:2007 Ships and Marine Technology – Ship's bridge layout and associated equipment – Requirements and guidelines.

"To ensure a clear view in bright sunshine, sunscreens with minimum colour distortion should be provided at all windows in front of workstations. Such screens should be readily removable and not permanently installed."

Sola Cure marine blinds have received the LRS type approval certificate for ocean going vessels. Visit www.sola-cure.com for more details.

For classification society requirements on ocean going vessels, we are pleased to advise on legislation specific to each society.

Luxury Sunfilms

Luxury Sunfilms by Auxano are a range of window blinds designed to combat the effects of sunlight in leisure craft. They are a simplified version of our highly successful Sola-Cure marine window blinds. Using the same high quality shade film, we have stripped away the cassette and wire guides to provide a cost effective UV window blind that can be trimmed to suit any size and shape of window.

In addition to providing a solution to the problems caused by sunlight, Luxury Sunfilms' blinds provide daytime privacy, additional night time security; reduce heating and cooling costs whilst improving your carbon footprint.

Features

- ✓ Smooth high quality revolutionary retraction system.
- ✓ Generates elegant external appearance
- ✓ Available in 2 exterior colours; gold and silver.
- ✓ Special one-way vision film.
- ✓ Standard sizes that are easily trimmed to suit if required.
- ✓ Can be fully or partially drawn.
- ✓ Suitable for inclined windows.
- ✓ Suitable for any shape of window.
- ✓ Easy to fit.
- ✓ SOLAS compliant.

Benefits

- ✓ Prevents fading to fabrics and furniture.
- ✓ Reduces glare when viewing television screens, laptops and navigation instrumentation.
- ✓ Provides daytime privacy from people passing by whilst allowing visibility to the outside.
- ✓ Aids security due to reflective film.
- ✓ Protects skin from harmful UV rays that cause ageing, eye damage and skin cancer.
- ✓ Reduces air conditioning / cooling costs in heat.
- ✓ Reduces heating costs in cooler climates.
- ✓ Reduces carbon footprint.

Non Marine Applications

Air Traffic Control Towers.

Air traffic control staff has a very demanding job that is often hindered by the sun. Direct and reflected sunlight can be both dangerous and unpleasant while in a working environment. This is especially pertinent when the working environment demands the very highest levels of safety and security.

Sola-Cure solve this problem, making the working area cooler and safer by reducing both the sun's glare, which can impair vision and reducing heat which can make staff lethargic and demotivated. Sola-Cure blinds help solve any difficulties relating to the sun's glare.

Crane Cabs

While working in an elevated position, operating in a dangerous environment, any interference from the sun can be disastrous. Sola-Cure offers the perfect solution. Our blinds offer an unrestricted view from crane cabs as well as reducing the heat and glare caused by the sun.

Heat can cause lethargy resulting in unnecessary mistakes. Glare from the sun can hide obstructions and potential dangers from the operator. Both are detrimental to the operating of a crane from the cab. We reduce these problems with our Sola-Cure blinds.

Sola-Cures' continuous quality development result in some of the most efficient prestigious products on the world market. When safety is paramount Sola-Cure is the quality choice to solve the problem.

Night and Day blinds

The revolutionary new Night and Day Blind from Sola-Cure

The new Night and Day blind combines a daytime privacy, anti-glare, heat reducing UV window blind, with a sleek and stylishly small cassette that contains a curtain track for night time privacy. Style and practicality in one neat package.

Daytime blind features

- One way mirror privacy
- Glare reduction
- Reduces internal temperatures
- Protects fabrics and furniture from fading
- Security aid

Night time curtain features

- Incorporated curtain track
- Improved insulation
- Select your own curtain fabric.
- Change curtain style frequently and easily

Min width = 400mm
Max width = 1400mm

Min drop = 500mm
Max drop = 1700mm

Deluxe Black Out Blinds

Sola-Cure has an amazing range of high quality blackout blinds available to the leisure, pleasure, cruising and commercial shipping industry. Blackout materials are available in a range of colours to suit any interior. Materials have been carefully selected to meet all criteria both technical and aesthetic. *The blinds provide a high level of light elimination and are extremely strong and durable.* The material is incredibly easy to keep clean by simply wiping with a damp cloth.

Deluxe Blackout Blinds

Mounting and mechanism

The ultimate in affordable opulence, designed to give up to 100% total light elimination. No other window blind offers the same style, choice and on-board practicality as the Deluxe blackout range. The deluxe blackout blind consists of an integrated cassette with side rails. The spring mechanism has a unique decelerator feature that delivers a retraction that is both smooth and stylish. Crucially where space is at a premium, the blind has an incredibly compact frame at just 4.2cm deep.

Side rails

Side rails are an integral part of the deluxe range and are supplied as standard. The side channels have internal brushes to give the highest possible light elimination and protect the fabric from wear. Colour and texture of the side rails matches that of the cassette that is available in a choice of colours, graphite textures and wood tones.

Features

- Colour coded cassette and side rails; available in a choice of solid colours, graphite textures and wood tones
- Decelerator cushioned motion during blind retraction
- Slim line cassette
- Blackout. High Level light elimination.
- Fire retardant to BS 5867:1980 Part2 Type B Flammability requirements in accordance with BS 5438:1976 Test method 2. Flammability of vertically orientated textile fabrics & fabric assemblies subject to a small igniting flame.

Printing

A unique service available on all Sola-Cure blackout blinds are our printing options; Both Deluxe and Luxury blackout blinds can be printed to incorporate a corporate logo, text, a favourite landscape, portrait, sporting moment or landscape image. We can even print one large landscape image spread over several blinds!

Luxury Black Out Blinds

Mounting and mechanism

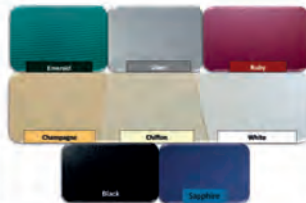

The Luxury blind is built with the very latest technology with a beaded child friendly side chain and tidy. Our base model is supplied as an open unit without the cassette cover. Covers can be specified with an option of colour matching fabrics to match the most elegant interior design criteria.

Side rails

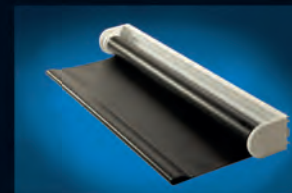

For total blackout on the water, Luxury blackout blinds are available with side rails that maintain the blinds position, parallel to the window. Side rails are available in three colours; white black and cream.

Features

- Beaded chain mechanism
- Available in a range of colours
- Blackout. High Level light elimination.
- Fire retardant to BS 5867:1980 Part2 Type B Flammability requirements in accordance with BS 5438:1976 Test method 2. Flammability of vertically orientated textile fabrics & fabric assemblies subject to a small igniting flame.

*Side channel
available for
maximum
blackout. No
light seepage.*
